Quick Question

Quick Question

1/1 point (graded)

A common problem in analytics is that you have some data available, but it's not the ideal dataset. This is the case for this problem, where we only have claims data. Which of the following pieces of information would we ideally *like to have* in our dataset, but are *not included* in claims data? (Select all that apply.)

☒ Blood test results

☐ Drugs prescribed to the patient

☒ Physical exam results (weight, height, blood pressure, etc.)
