Quick Question

Quick Question

1/1 point (graded)

Run the cutree function again to create the cluster groups, but this time pick $k = 2$ clusters. It turns out that the algorithm groups all of the movies that only belong to one specific genre in one cluster (cluster 2), and puts all of the other movies in the other cluster (cluster 1). What is the genre that all of the movies in cluster 2 belong to?
